

Track Entities. Visualize Relationships.™

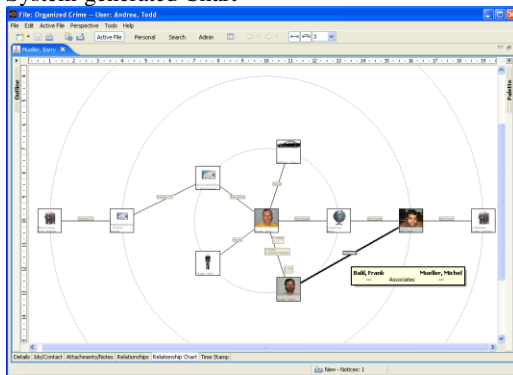

Overview

REX™ is Agnovi's world-class intelligence solution for tracking entities and visualizing relationships.

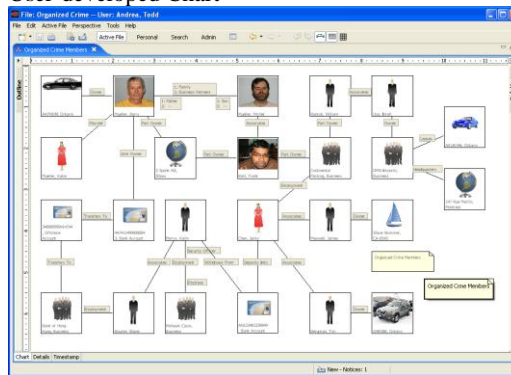

For tracking gangs, suspects, offenders, etc., **REX** has an embedded relational database that supports the storage of structured entity information, advanced entity searching and instant collaboration. Additional benefits include scalability, ease-of-use, attachment support (text, images, audio, video, etc.), report generation, system administration, multilingual support, security (privilege-based access, event notification, encryption, etc.) and more....

Hardware Requirements

REX has client and server components. The client and server components are currently available for the Microsoft Windows platform (Windows 2000 and later). For non-Microsoft platforms, please contact Agnovi Corporation for further information.

Client Hardware	Minimum	Recommended
Processor	Pentium III	Pentium IV
Memory	512 MB	1 GB
Hard Disk Space	150 MB	
Display Resolution	1024x768 (XGA)	

**Browser version coming soon

Server hardware requirements vary depending on concurrent usage and data volume.

Server Hardware	Minimum	Recommended
Processor	Pentium III	Pentium IV
Memory	512 MB	2 GB
Hard Disk Space	750 MB + data and document volume	

Note: For a single-user installation, where both client and server components are installed on the same computer, adhere to the server hardware requirements.
