

Overview

X-FIRE™ (pronounced “crossfire”) is Agnovi’s best-in-class investigative case management software for law enforcement and police. Designed with the investigator in mind, **X-FIRE** is the top tool available to support major investigations—from initial incident to court disclosure. Easy-to-use, comprehensive, powerful and affordable...**X-FIRE** uses a relational database (SQL Server, Oracle or MySQL) for storing structured investigative information (cases, entities, events, evidence, tasks, incidents and contacts), advanced searching and instant collaboration. Additional features include scalability, workload management, attachment support (text, images, audio and video), report generation (case reports and advanced metrics), system administration, multilingual support, security (privilege-based access, usage auditing, event notification and encryption), and more...

- ✓ Control the speed, flow and direction of investigations
- ✓ Ensure investigator accountability and exhibit continuity
- ✓ Coordinate and control disclosure of case documentation
- ✓ Guarantee efficient and effective investigative operations
