

Investigation and Criminal Intelligence Database Software

Easy-to-use and affordable.

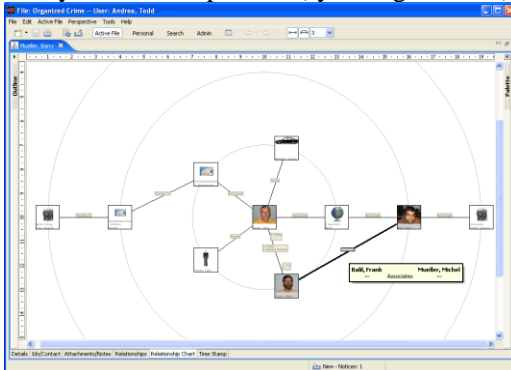

Overview

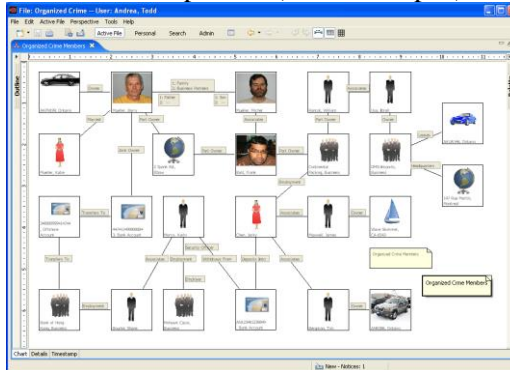

REX™ was designed with small teams of police and law enforcement in mind. Its easy-to-use interface helps you manage investigation and intelligence information. You can easily document, search and report law enforcement activities (e.g. statements, tactical operations) and subjects (e.g. suspects, offenders, informants, places and things). **REX** uses the MySQL relational database for storing structured investigative information, advanced searching and instant collaboration. Other **REX** benefits include scalability, attachment support, report generation, Web-based, security and more...
